

### Street Name Signs

Retroreflective street name signs increase the safety of motorists and aid first responders, allowing intersections and turns to be quickly identified. Our street name signs are standards compliant, meeting design guidelines established by the Federal Highway Administration in its Manual on Uniform Traffic Control Devices. A variety of materials, colors, and retroreflective finishes are available, and full color logos and other custom features can also be added to our street name signs.

### Specifications

- Our street name signs are M.U.T.C.D. compliant
- Printed on both sides by default
- Retroreflective for excellent nighttime visibility, meeting or exceeding ASTM 4956D Type III/IV or IX/XI standards (depending on selected finish).
- Typical substrate is .080" aluminum (alloy 5052-H38, meeting ASTM B209 standards). Other options, such as extruded aluminum and thicker gauges, are also available.

### Standard Colors and Finishes

**GREEN**

**BLUE**

**BROWN**

**BLACK**

	Full Cube Microprismatic (FCP)	High Intensity Microprismatic (HIP)
<b>Retroreflectivity Type (ASTM D4956):</b>	IX, XI	III, IV
<b>Sign Type:</b>	Permanent	Permanent
<b>Durability:</b>	*15 Years	*12 Years
<b>Nighttime Visibility:</b>	Excellent	Good
<b>Service Temperature:</b>	-10°F to +150°F	-10°F to +150°F

\*Durability is rated with OL-1000 Anti-Graffiti overlamine, which is standard with all of our street name blades. Durability without OL-1000 is 12 years for FCP and 10 years for HIP reflective finishes.

### Protective Anti-graffiti Overlamine

Anti-graffiti overlamine is applied to all of our street name signs to protect them from vandalism and to increase their outdoor durability. The anti-graffiti film is resistant to most common solvents, and prevents spray paint, permanent markers, and decals/stickers from adhering to the sign. Most graffiti can be easily cleaned from the surface of the sign. This protective film provides an outdoor durability of 12 years for high intensity prismatic reflective and 15 years for full cube prismatic reflective street name signs.

## Typical Sizes

Standard widths vary from 18" to 48" and are determined by length of street name.

Sign Height (in.)	Letter Height (in.)	Conditions
6	4	Two-lane road with speed limit of 25 MPH or less
9	6	Speed limit 40 MPH or less
12	8	Speed limit 40 over MPH
18	12	Overhead mounted

Lettering size requirements are specified in M.U.T.C.D. 2009 Edition with Revisions 1 and 2, Section 2D.43.

## Lettering and Borders

### Style 1

Mixed-Case Lettering (M.U.T.C.D. Standard)

No Border

With Border

### Style 2

All Uppercase Lettering

No Border

With Border

## Custom Logos

Full-color logos can be added to street name signs with the same ink and warranted durability as the rest of the sign.
